

New Jersey's Telephone Consumer Protection Act (Docket 02-278) should not be weakened. This Act has afforded New Jersey residents with the privacy they deserve within their homes. It especially assists our Senior residents against fraud and forceful unsolicited sales matters. Many Seniors have been victimized into providing their personal information over the phone resulting in identity theft. So the Telephone Consumer Protection Act serves a dual purpose of protecting its citizens from fraud and allowing them to choose how their home phone service is accessed.

Thank you - Sandra A. Reese
